Lake City, FL 32055

Lunch will be served at 11:30
For information call 386-754-7083

Mark Lander

Administrator of the Columbia County Health Department

The Florida Department of Health in Columbia County operates on the principles of the community's expectations and needs as identified through collaborative community health assessments. Priorities of the Department are established through departmental strategic planning and collaborative community health improvement planning with external partners. Efforts of these initiatives align with the foundation of Public Health through communicable disease prevention, environmental health protection, clinical care and emergency response. Our dedication to the community that we serve is reflected service excellence and customer commitment. Mr. Lander will share information on all the services provided by our local Dept. of Health and the vision he has for the future of the department as they work to serve our community.
